Chapter 01
Tolerance of the Rasool (صلی اللہ علیہ وسلم)

Learning Outcomes:
After completing this lesson, the students will be able to:
- make nouns from the verbs
- identify and use suffix
- change sentence into negative and interrogative

Pre-reading:
1. Do you know the meaning of tolerance?
2. Can you recall an incident of tolerance from the life of the Rasool (صلی اللہ علیہ وسلم)?

1. Tolerance means to bear pain or hardships with patience. It also means to bear things you do not like. For example, when you are in a position to take revenge, but you do not do so, you are displaying tolerance. The greatest tolerance was practised by our Rasool (صلی اللہ علیہ وسلم).

2. The Rasool (صلی اللہ علیہ وسلم) is a model of tolerance. He (صلی اللہ علیہ وسلم) never wished ill for anyone. Hazrat Ayesha (رضی اللہ عنہا) said that the Rasool (صلی اللہ علیہ وسلم) never took revenge upon anyone. Abu Sufyan was the worst enemy of Islam before he became a Muslim. At the conquest of Makkah the Rasool (صلی اللہ علیہ وسلم) not only forgave him but also honoured him by declaring amnesty for those who took refuge in his house.

3. When the Rasool (صلی اللہ علیہ وسلم) went to Taif to preach Islam, the people there threw stones at him. Hazrat Jibrael (ملائکہ) asked the Rasool (صلی اللہ علیہ وسلم) on the occasion of trial, “O, Muhammad (صلی اللہ علیہ وسلم) speak, if you so wish, I will

For the Teacher:
- Enhance students’ interest for the given topic with the help of pre-reading activity.
- Help students understanding paragraphs i.e. topic sentence, supporting details, etc.
destroy them.” The Rasool (ﷺ) replied, “O Gracious and Merciful Allah, show them the right path, for they do not know what they are doing. They do not recognize me. They do not know I am Muhammad (ﷺ) the Rasool of Allah. Make it known to them that I am their great well-wisher”. We should follow the teachings of our Rasool (ﷺ). In form and feature, face and limb,
I grew so like my brother,
That folks got taking me for him,
And each for one another.
It puzzled all our kith and kin,
It reached a fearful pitch,
For one of us was born a twin,
Yet not a soul knew which.

One day to make the matter worse
Before our names were fixed,
As we were being washed by nurse,
We got completely mixed;
And thus you see by fate’s decree,
Or rather nurse’s whim,
My brother John was named me.
And I was named him.

This fatal likeness ever dogged
My footsteps when at school,
And I was always getting flogged,
For John turned out a fool.
I put this question fruitlessly
To every one I knew,
‘What would you do, if you were me,
To prove that you were you?’

Pre-reading:
1. Who is a woodcutter?
2. Can you predict the story by looking at the title and the picture of the story?
3. How many characters do you see in the picture?

For the Teacher:
- Conduct pre-reading activity to create students’ interest in the text.
1. A woodcutter and his wife lived in a village. They had seven children, all of them were boys. The woodcutter and his wife were so poor that at times they did not know where to get money to buy food for their children. The children were growing so fast that they always felt hungry.

2. The youngest son, however, was the one who caused his parents the utmost anxiety. It is true that he did not eat much, but this was because he was so small. Indeed, when he was born, he was only the size of a pepper, and that was why he was named Mirchu.

3. Once it happened that there was no rain for months on end. A great famine spread across the land and the woodcutter soon had nothing to give to his family. All the savings were gone and there was nothing left to eat.

4. “We can no longer feed our children.” The woodcutter told his wife one night as they sat beside the empty hearth. “When the boys get up in the morning for their breakfast there is nothing for them to eat. My dear, there is only one thing that we can do. We must take them into the forest and leave them there. May be some rich man finds them and takes them home. I am sure that he'll take better care of them.”

5. The poor wife cried and cried. She was so full of sorrow to hear this. But, at last, as the night wore on, she agreed to her husband’s plan. After all, she could not see her children die of hunger. She thought and thought, but no other plan came to her mind. She wished, she had only three children instead of seven. They could have been fed well and brought up nicely.

6. As the woodcutter and his wife argued, they raised their voices. The little Mirchu heard every bit of what they said.

Unlike his brothers, he was not asleep. For a long time he lay thinking what would be the best thing to do. As soon as it was twilight, he got up quickly and crept out of the cottage and off he ran to the forest. He filled his pockets there with small white stones. Then he ran back to the house and was in bed again all quiet and pretending to be fast asleep when his mother called him.

7 “We are all going to the forest.” His mother told the boys, “You must all help your father gather firewood, for there is no money left to buy any food.” The boys were so excited that they completely forgot about their hunger and were in no time on the way to the forest with their father leading. The forest was dark and lonesome but the woodcutter knew every bit of it so well that before long they were right in the deepest part of the forest.

8 “I will cut down the small trees,” said the woodcutter, “and you boys must collect all the branches and tie them into small bundles. It is going to be hard work.”

9 With that he cut the trees with his axe and set his seven sons to work. While the boys were gathering as many sticks as they could, the woodcutter nodded to his wife and the two of them just sneak away.

10 The boys felt a kind of shudder. They began to shout and call for their father, thinking that he might be playing some kind of a trick with them. When, however, he did not appear for quite some time they really felt frightened and began to cry bitterly. Then the clever Mirchu said, “Do not worry, boys, I know the way home. All we have to do is to follow the trail of the white stones. Father isn't

For the Teacher:

- Read the text with expression using correct intonation patterns to make the story more engaging and interesting for the students.
going to come.”

11 Mirchu's brothers, however, doubted what he said. At this he repeated what their father had said the night before and told them how he had filled his pockets with stones and dropped them one by one on the way. So Mirchu led his brothers through the deep forest and along the winding paths until they reached the cottage. “Perhaps we are not going to be welcomed”, Mirchu said softly. “Let us wait outside the cottage for a while and see if we can hear what father and mother are talking about.”

12 When the woodcutter and his wife arrived home early that day they had found ten silver coins waiting for them. This was in payment of a debt that they had long forgotten about. At the sight of so much money the woodcutter's wife wept with joy. But when she remembered that she would never see her boys again, all her joy vanished and she began to sob. “What use was that money to her now,” she thought.

13 “My sons, my poor little sons.” She exclaimed sorrowfully, “What would I not give to have you safely back home. Perhaps, by now they might have been eaten by wolves.” This was all Mirchu wanted to hear. He pushed the door open and ran to his mother. His brothers followed him too.

14 “Don't cry mother. We are all here. All safe and sound.” What joy and happiness there was in the woodcutter's cottage that night and what a feast they all had as they sat around the table! The woodcutter, his wife and all their seven sons lived happily ever after.

Well done, Little Mirchu!

2. There are many sports played worldwide. The top five sports are football, cricket, basketball, hockey and tennis. Among all these, hockey is our national game. It is played throughout the country. Many countries of the world started playing hockey in the 19th century. It became very popular in Great Britain. British soldiers brought this game to the subcontinent when Great Britain occupied this part of the world in the 19th century. So, in the history of Pakistan hockey is as old as that of the country itself.

The objective of the game is to get the ball into the opposing team's goal.

The team that scores more goals wins the match.

5 The match consists of two periods of 35 minutes with a short half-time break of about five to ten minutes. If there is an even score, or tie at the end of regulation time, two extra time periods of seven-and-a-half minutes can be given. The first team to score a goal during this time is the winner and the game stops. This is called the golden goal rule. If there is still a tie at the end of extra time, penalty strokes will decide a winner.

6 Women also actively take part in the game. An international Women Hockey tournament was held in Lahore in 1996. Pakistani women hockey team participated in it. Pakistani women hockey is still thriving and making its way to the international level.

7 The following titles were won by Pakistan. The first Asian Games hockey title was won by Pakistan (1958-Tokyo). The first World Cup was won by Pakistan (1971-Barcelona). Given Your grace

Who earn Your anger
Not of those
Who go astray.'
But when the wind
Makes noise in the mango tree

Holds out its yellow
Richness, I say this
'Not to remind You
Of me, but myself
Of this and all of You.'

1 Hazrat Umar (رضي الله عنه) was the second Caliph of Islam. He was born at Makkah in a noble tribe called the Quraish. He received the title of ‘Faruq’ after he embraced Islam. He was one of the very few persons in Makkah who could read and write. He was a tall, strong and brave man. He was also a very good wrestler, horse-rider and swordsman. Business was his occupation. Hazrat Umar’s conversion to Islam was of great value to the Rasool (صلی اللّه علیه وآله وسلم) in his mission of Islam. Afterwards, he remained very close to the Rasool (صلی اللّه علیه وآله وسلم).

2 Hazrat Umar (رضي الله عنه) remained Caliph for 11 years. He conquered a vast empire during the 11 years of his Khilafat. He introduced a great system of administration, which served as a model for the Islamic world. He introduced many reforms during his reign such as administrative courts to investigate the complaints against the offices of the state. He also reformed army, police force and tax system.

3 Hazrat Umar (رضي الله عنه) gave great importance to justice and well-being of the people. He was very strict in the case of judgement. He would not spare any one, not even his own son, if wrong was committed by him. For him high and low, rich and poor, were all equal before law. He followed the saying of the Rasool (صلی اللّه علیه وآله وسلم) “Treat your servant as you would treat yourself. Master and servant are both equal before Allah.” The worship places and property of the non-Muslims were given protection.

4 Hazrat Umar (رضي الله عنه) was kind and sympathetic to the poor. He spent many sleepless nights roaming in the streets to see the conditions of his people. One night he passed by a house and heard children crying. There was a pot of water on the fire. The mother was telling the children to go to sleep and when the food was ready she would wake them up. But the children
would not listen. Hazrat Umar (رضي الله عنه) asked the woman, “What is the matter?” She told him that there was nothing to eat. There was no money and no grain in the house. Her husband had died. The children were crying for food. He (رضي الله عنه) helped the widow with food, money and clothing.

5 One day, while Hazrat Umar (رضي الله عنه) was saying his namaz in the masjid, a non-Muslim named Feroze killed the Caliph with a knife. Hazrat Umar (رضي الله عنه) lies buried near Hazrat Muhammad (صلى الله عليه وسلم) and Hazrat Abu Bakr (رضي الله عنه) in Madina.

2. How should we acknowledge the people who help us?

For the Teacher:

- Help the students imagine a terrible situation because of storm.
- Focus must be on motivating students to learn to do good in every situation.
Once there was a holy man who lived in a forest. He lived there all alone in a small hut. He was a very kind and noble man. He always liked to help others.

One night there came a terrible storm in the forest, followed by heavy rain. The holy man was busy in his work when he heard a knock at the door.

He opened the door and there stood before him a gentleman who spoke to him thus; “Sir, I am a hunter. I came to the forest to hunt, but because of this storm and the heavy rain it is not possible for me to hunt, I cannot go back either. I am looking for shelter. I shall be grateful if you could let me spend the night here.”

The pious old man without any hesitation asked him to step in. He gave him a towel to dry himself. He then gave him a cup of hot milk to drink.

The hunter looked around. It was a small hut with one small bed. Only one person could sleep on it.

“Sir, this is a very small hut and there is hardly room for two. How are we going to spend the night here, the two of us?” said the hunter.

The pious old man said. “You are very simple. True, this hut is small, very small indeed, but if one has the will one can manage”.

The hunter was satisfied with this answer. He started drinking his milk. Another knock at the door. This time even louder. The pious old man opened the door. There was a farmer asking for shelter.

“Sir, I am a farmer, but in this heavy rain there isn’t a thing that I can do. I can’t even go home. Could you please give me shelter for the night?”

The pious old man allowed the farmer to come in. He offered him a glass of milk.

Now there were three men, instead of two, in that small hut. The farmer was surprised. He said, “Sir this is a small room. You already have a guest, how are we going to spend the night in this small hut?”

The pious old man told the farmer that in case they could not sleep, they could at least stand all night.

The weather outside was becoming more harsh. Some one was
knocking very hard at the door again. The pious old man moved to open the door. The farmer however asked him not to do so.

“There is hardly any place for the three of us in this room. How could we accommodate any more people?”

The old man was very kind and generous. He could not see people in trouble. He was always ready to share whatever he had with others. He said to the farmer, “The weather was bad outside. You wanted shelter. You knocked at my door and I opened it for you. Just imagine what might have happened if I had not allowed you in”. The knocking at the door was still going on.

The old man didn't wait to hear the farmer any more and rushed to open the door.

This time there was a mother with her two small kids, shivering in the cold.

The old man asked them to come in at once and said to the farmer, “Now see what would have happened to the little kids in the cold, stormy night”.

The farmer felt guilty and apologized to the holy man. “I am very sorry, Sir. I was selfish. Please forgive me. I’ll never say such things again.”

**For the Teacher:**
- Give some other topics to the class and ask them to practise in pairs.
1 “Hello! Hello! This is Alexander Graham Bell. Do you hear me?”

“Yes, I do. How are you, Alex?”

This was probably the very first telephonic conversation that might have taken place between Alexander Graham Bell and his friend, miles away, in the year 1876. Bell must have uttered these words into a small transmitter. He must have been heard by his friend through the receiver. Besides a transmitter and a receiver the telephone has a dial with numerals on it, to help you dial any number that you want. The telephone was a great invention. The whole world received it, when it was invented, with a sense of surprise, awe and admiration. The invention has made history and has brought people and places so near to each other.

For the Teacher:

- Guide the students to have conversation on imaginary telephone.
- Share some etiquette for using mobile.
Alexander Graham Bell was originally a Scot. He was born in 1847 in Scotland and later went to America where he invented the telephone. He died in 1922.

2 The telephone then became very common. People just had to lift the receiver and start talking to anybody anywhere any time. A telephone is a great facility indeed. It reduced distances and gave a great impetus to business as well.

3 The principle on which the telephone is based is by no means unfamiliar to you. You must have played the game yourselves. Let’s try it again. Take two small tin cans with their tops off. One for you and one for your partner. Make a little hole in the bottom of your can. Put a string through this hole and tie a knot inside. Do the same thing with the other end of the string and the other can. Now you have a simple telephone set of your own, a plaything though. Speak into the can. Your voice will make the bottom of this can vibrate. If you hold the string firmly, you’ll feel the vibrations travelling along it. These vibrations make the bottom of the other can vibrate, too, and it makes sounds similar to your voice. You can thus hear each other through the string.

4 The real telephone works very much like this tin can-and-string phone, but, of course, it does a lot better. The tin can-and-string phone sends sounds as vibrations while the real telephone sends sounds as electrical signals. These signals can travel long distances with the help of wires. These distances are much larger than those which the vibrations of the tin can-and-string telephone can cover. When you speak, you make sound waves and these sound waves go into the transmitter of your telephone. These sound waves change into electrical signals which go to the other receiver and are there changed again into sound. That’s how we can talk to each other on the telephone.

5 A lot of work has continued to be done on the telephone since Bell’s days. The invention of mobile has revolutionized the history of telephone. Now the era
of strings and old receiver dials are the things of past. These have been replaced by smart and handy mobiles. These mobiles have internet, video camera, voice recorder and games, etc. The mobiles have revolutionized the world we are living in.

Chapter 14
Let’s Make Our Roads Safer!

Learning Outcomes:

After completing this lesson, the students will be able to:

- deduce meaning of difficult words from context
- use context to infer missing words
- explore causes and consequences of a problem or an issue and propose various solutions
- write a simple unified paragraph on a given topic
- proof read and edit texts for errors
- use words in sentences
- know about synonyms and antonyms
- recognize syllable division

Pre-reading:

1. Did you see any road accident? What was the reason?
2. What should we do to avoid accidents?

For the Teacher:

- Conduct pre-reading activity to create students’ interest in the text and to assess their previous knowledge on the topic.
Every day when we go to schools, offices or markets we have to use roads and pass through traffic. You must have noticed that sometimes people violate traffic laws such as over speeding, non wearing of helmets, seat belts, and passing through red signals. This makes our roads insecure and unsafe. Majority of victims of road accidents, unfortunately, are young people below 30 years of age. Moreover, indiscipline on roads leads to traffic jams and congestions, which reflect negatively on us as a nation.

The question is whether the number of accidents and causalities can be reduced? The answer is yes – if we recognize road safety as a social issue and play our role and discharge our responsibilities we can overcome this problem. The foremost responsibility of every citizen is to observe laws; violations of a traffic law is an offence. None of us would ever like to be called an “offender” and get penalized. By observing traffic laws we can avoid road accidents, save precious lives and improve our country’s image.

The research shows that almost 80% of traffic accidents take place due to mistake or negligence of drivers. Main causes of accidents are:

- **Over speeding and rash driving:**

  Over speeding is most crucial factor causing fatalities or injuries in road accidents. Speed limits are specified for different roads. The drivers are required to drive their vehicles within given speed limits and should reduce speed near schools, colleges, hospitals, urban areas and during inclement weather conditions. Violations of prescribed speed limits not
only endangers lives of road users but can also invoke penalties and legal action under traffic laws.

- **Use of mobile phones while driving:**
  Using mobile phone while driving is a potentially dangerous act, which can cause serious accidents. It diverts driver’s attention. We should avoid using mobile phones while driving and discourage others from doing it as it is prohibited under traffic laws.

- **Not wearing seat belts:**
  Wearing seat belts by drivers and passengers in a vehicle can save lives. During an accident, seat belt can reduce the risk of fatal injuries by 50-60%. Non wearing of seat belts is also punishable under traffic laws. We must, therefore, always wear seat belts before starting our journey.

- **Not wearing safety helmet:**
  Motorcyclists are highly vulnerable to fatal accidents. Many students use motorcycles / cycles for going to their institutions but often they do not put on safety helmets. Wearing helmet gives protection against severe head and face injuries in case of an accident and increases the chances of survival by 80%.

**For the Teacher:**

- Tell them more about traffic rules and laws.
- Tell them the benefits of following the traffic rules and laws.
- **Violating traffic signals:**
  Traffic signals are important tools to manage the traffic. It is mandatory to stop on a red signal. Passing a red signal is a serious violation of traffic laws and we should never commit it. We should also respect and obey the police officers manually managing the traffic.

- **Violating lane discipline:**
  A road is divided in lanes through road markings (white lines). Lanes are meant to maintain traffic discipline. We should keep in a particular lane and indicate properly before we change that lane. Lane straddling may cause serious accident and invoke fine under traffic laws. Extreme left lane is for heavy and slow moving vehicles and extreme right lane is for overtaking.

- **Violating traffic signs:**
  Traffic signs on side carry important information for road users, violating these signs can be potentially dangerous for ourselves as well as others.

4. As responsible road users we should not only take steps to save our own and others' lives but should also observe road courtesies to help create better environment on roads.

5. Traffic discipline reflects the civility of a society so we should prove ourselves as a law abiding and responsible nation.

**For the Teacher:**
- Introduce traffic signs with the information they carry.
